

Gussago, 30 March 2022

FIRECO s.r.l. has decided not to participate at INTERSCHUTZ 2022

In the last weeks our presence at this important exhibition was a subject of ongoing and intense internal discussions.

We took our time to ponder this final decision and to contemplate the pros and cons.

On the one hand we were looking forward to the event and couldn't wait to personally meet our customers and to show a lot of new product solutions and features that were added to our portfolio very recently.

On the other hand we had to take a combination of different factors into account which, in the end, outweighed our pleasure to participate.

The current political and economic situation as well as the rising number of COVID-19 infections have created a climate of global insecurity.

The number of employees under quarantine continues to be on a high level. In addition to that, delays in the supply chain as well as prices for raw materials and energy that keep spiking are a challenge for businesses around the globe.

In a situation in which all the aforementioned factors already caused unfavourable conditions, the cancellation of some of the most important manufacturers of the industry definitely tipped the balance. It was very hard for us to take this decision and we are sad that recent events did not go the way we all hoped they would.

We hope that our customers and partners as well as the fair visitors will understand our decision under the given circumstances. We can assure them that the FIRECO team appreciates their loyalty and ongoing support in a period that is challenging for everybody. FIRECO will continue to be a reliable partner and to provide highest quality solutions for the industry. However, we conceive of our decision not as a cancellation, but as a postponement! And we will thus be more than glad to welcome all our friends and partners on our booth at the INTERSCHUTZ 2025.
